

THE VILLAGE OF
OAK LAWN

PLEASE HELP US, HELP YOU!

**By working together, the Oak Lawn community
can get pest-related problems under control.**

- Eliminate **all** bird feeders and never feed wildlife; healthy animals will find their own food
- Clean up after pets **DAILY** – pet feces is a source of food for rodents
- Do not leave pet feeding bowls outside unattended
- Keep grass cut and bushes trimmed to eliminate comfortable nesting areas
- Pick-up and discard fallen fruit from trees and excess vegetables from gardens
- Eliminate any debris in your yard and landscaping
- Garbage containers must be in good condition and lids kept closed
- All firewood must be elevated at least 4 inches off the ground
- Keep porches, decks and garages tidy to avoid critter hiding places
- Check your property for any areas that would be conducive for rodents to hide and breed

Thank you,
